Everyday Life of Malaya in the Early 1960s Through a Surveyor's Lens

📅 April 27, 2018 📁 1960s, life & culture, Malaysia, people

Malaya is a former country in Southeast Asia that consists of the southern part of the Malay Peninsula and some adjacent islands (originally including Singapore) and that now forms the western part of the federation of Malaysia and is known as West Malaysia.

The area was colonized by the Dutch, Portuguese, and the British, who eventually dominated; the several Malay states federated under British control in 1896. The country became independent in 1957, and the federation expanded and became Malaysia in 1963.
